hi,  
While running the simulation and analysis file i am getting the following error. I wanted to know the reason of getting this error & how to solve it?

1. error in fill list
2. pdg code not found in database in a red blinking line while program is running
3. could not convert genfit track to pnd track and no convergence after 21 steps

this is the error which i get while running the simulation file for all decay of x(3872)

Dear Foram Shah,

the warning messages 2) and 3) that you got, should not worry you too much.  
About the message 1) "error in filling list":  
Could you please post the error message that you obtain? Please, say also which trunk/release version you are currently using, and which operative system.

cheers, Elisabetta

Hi,

it looks to me that you did not define the eta list. Please, follow the instructions at the page  
<https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootRhoTutorial>  
#General\_Documentation\_of\_Rho\_classes

cheers, Elisabetta
