Hi,

I am running dpm events in between the simulation I am getting some lines like

```
**** GTRIGI: IEVENT= 279 IDEVT= 279 Random Seeds = 1806098326      0
POINT EXECUTION *****
no TCI found for DetectorID 1010050036
**** GTRIGI: IEVENT= 280 IDEVT= 280 Random Seeds = 1806098326      0
POINT EXECUTION *****
**** GTRIGI: IEVENT= 281 IDEVT= 281 Random Seeds = 1806098326
```

Can you tell me why it is coming?

Thank you

This is a bug of the forward EMC. It should not be problematic.
