Hi,

can anyone tell me which are the units coming form the vtx fitter?? are they in cm or mm?? thanks

The standard units are GeV and cm.

Too bad for me..

Thanks a lot anyway!!

Hello Alexandros,

I experienced some problems with vertex resolution and loss of efficiency, too, recently, in the analysis of the Ds mesons, which I am working on.

I had used the trunk rev 25345.

Due to some geometry update, apparently it looks there was a bug in that trunk revision. Now I updated my trunk to the rev 25545, as Stefano suggested some days ago; and it looks much better.

This is maybe the problem that you found(?)
