---

I have been trying to follow the PandaRoot installation guide and have a problem regarding the installation of the external packages of PandaRoot. I followed the instruction as per the webpage [https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootInstallGit?validation\\_key=%253fc115c8c81fb2e2a7188fe38a913bbbf](https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootInstallGit?validation_key=%253fc115c8c81fb2e2a7188fe38a913bbbf). I attach the screenshot of the error message at the end of the faulty installation. Please help if anyone has any suggestion.

Could you please report in the FairRoot forum, writing also the Linux distribution you are using?
