
Subject: Seed in /macro/master/sim_complete.C

Hi everyone,

I tested the new master macros today. When I run sim_complete.C with a dec-file, the seed is always changed from -1 to 4357.

After I added the line

gRandom->SetSeed();

to sim_complete.C the seed is set properly . It seems that this line is missing somewhere.

Cheers,

Jenny

gRandom->SetSeed() is to have a random seed each time you run a simulation. If you do not write the line, the seed is always the same.

The line has to be added only if needed.
