

Hi,

when trying to update my pandaroot installation on kronos with 'svn up', I get the errors/warnings:

```
svn: warning: W200000: Error handling externals definition for 'genfit2/core':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/core'  
svn: warning: W200000: Error handling externals definition for 'genfit2/doc':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/doc'  
svn: warning: W200000: Error handling externals definition for 'genfit2/eventDisplay':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/eventDisplay'  
svn: warning: W200000: Error handling externals definition for 'genfit2/fields':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/fields'  
svn: warning: W200000: Error handling externals definition for 'genfit2/finitePlanes':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/finitePlanes'  
svn: warning: W200000: Error handling externals definition for 'genfit2/fitters':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/fitters'  
svn: warning: W200000: Error handling externals definition for 'genfit2/measurements':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/measurements'  
svn: warning: W200000: Error handling externals definition for 'genfit2/trackReps':  
svn: warning: W120107: Unable to connect to a repository at URL  
'https://svn.code.sf.net/p/genfit/code/trunk/trackReps'  
At revision 29764.  
svn: E205011: Failure occurred processing one or more externals definitions
```

I already have the proxy lines

```
http-proxy-host = proxy.gsi.de  
http-proxy-port = 3128  
http-proxy-exceptions = *.gsi.de
```

in my .subversion/servers file.

Does somebody know what's going wrong?

Best regards and thanks,
Klaus

Hi,

I see the same today. No idea what happened.

If that issue persists, are we allowed to store the code on our svn?

Cheers!
Ralf

Hi Klaus,

if I try to load

<https://svn.code.sf.net/p/genfit>

in my browser I get an "unable to connect" error.
For me it looks like a problem with sourceforge. Are you sure that the URL is still valid?

Ciao

Florian

On the sourceforge side there is written that genfit has moved to
<https://github.com/GenFit/GenFit>.

Cheers,

Tobias

Yes, it is always a problem of sourceforge.

The idea to have a hard copy on our svn is not bad, I did it already for genfit (genfit1).

Hello,

I did not change anything in the genfit sourceforge repository recently, so I guess it is a problem of sourceforge.

On the other hand, the sourceforge version is not being updated anymore.

Since it is not straightforward to do an svn checkout from a git repository, its maybe a good idea to copy the latest version from github into the pandaroot repository.

Cheers,
Johannes

It looks like it is possible to include a git repo as an SVN external:

<https://www.leewillis.co.uk/including-git-repo-svn-external/>

Cheers,
Johannes
