Subject!
Please, comment why you choose one of the methods more often...

Later on I will post the right answer

P.S. BTW, this is also testing of a poll

What would you prefer to use in your code?(total votes: 3)

Prefix increment operator 2/(67%)
Postfix increment operator 1/(33%)

Don't be shy
It is simple question. Please, choose one of the options.

Let's call it, statistics gathering

Hi,
I prefer the prefix version.

To keep my code readable, I use the ++-operator in one line for itself. In this case, there's no difference between the prefix and the postfix version. If you try to implement it by yourself, you will see that the prefix version is much easier, say faster und smaller.
