Hi,

I've successfully installed FairSoft (march17), defined SIMPATH and did a "git pull" for FairRoot, but when running cmake to install FairRoot I get the following error for the STRIP sub command:

```
cmake -DCMAKE_INSTALL_PREFIX=/home/mala/FAIR/FairRoot_Install
/home/mala/FAIR/FairRoot/
```

```
-- fairsoft-config found
```

```
CMake Error at cmake/modules/CheckCompiler.cmake:34 (String):
```

```
string sub-command STRIP requires two arguments.
```

```
Call Stack (most recent call first):
```

```
  CMakeLists.txt:55 (Check_Compiler)
```

```
CMake Error at cmake/modules/CheckCompiler.cmake:35 (String):
```

```
string sub-command STRIP requires two arguments.
```

```
Call Stack (most recent call first):
```

```
  CMakeLists.txt:55 (Check_Compiler)
```

```
CMake Error at cmake/modules/CheckCompiler.cmake:36 (String):
```

```

```

```
  CMakeLists.txt:55 (Check_Compiler)
```

```
-- Configuring incomplete, errors occurred!
```

Can anyone help, please ?
Cheers,
Marc

Hi Marc,

could you please execute the following commands in the terminal after you have defined the environment variable SIMPATH and post the results.

```
$SIMPATH/bin/fairsoft-config --cc  
$SIMPATH/bin/fairsoft-config --cxx  
$SIMPATH/bin/fairsoft-config --f77
```

Ciao

Florian

Hi Florian,
I've managed to install everything now.
When I up-graded to FairSoft march 2017, I didn't clean up my previous installation.
So, I was getting the message that FairSoft was installed without errors but I guess that's because my upgrade was ignored.

Thanks anyway.
Marc
