

Dear all,

I wa trying to install the latest version of CBM simulation software in ubuntu 16.04. While FAIRSOFT and FAIRROOT could be installed successfully, an error ocured in the intallation of CBMROOT. Error messages are given below It would be a great help if someone helps me to sort out the issue.

Error messages:

Hi Somen,

I wonder how you come to the versions of CbmRoot, FairRoot, and FairSoft you use in the autoinstall script. Since you try to compile CbmRoot JUN16 release the versions defined in the script are FairSoft nov15p6 and FairRoot v-15.11e. For your compilation you use FairSoft may16p1 and FairRoot v-16.06b which are the versions used for the trunk version of CbmRoot.

The CbmRoot release JUN16 will not work with the latests FairSoft and FairRoot versions. There have been many changes which are incompatible with the CbmRoot release JUN16. Beside the error you encounter already there are many more problems.

Either use

> FairSoft nov15p6 and FairRoot v-15.11e with CbmRoot JUN16

or

> FairSoft may16p1 and FairRoot v-16.06b with CbmRoot trunk

A mixture of both will not work.

Ciao

Florian

Hi Uhlig,

Thank you for your reply.

I have changed the versions in 'autoinstall_framework.sh' file, which is under the source directory. Earlier I was tried to install the simulation software using default versions(fairsoft:: nov15p6 and fairroot:: v-15.11e), but error was occurred at the time of fairsoft installation (using command:: autoinstall_framework.sh 1). The error message is given below.

Error message:

```
=====  
= =====  
processes for build : 4  
Installation Directory: /home/somen/cbmsoft/cbmroot/fairsoft_nov15p6_root5/installation  
Found cmake version 3.5.1 which is newer than the  
required version 3.1.0 in PATH  
This version is okay. Don't install cmake as external package.  
*** Unpacking gtest-1.7.0.zip .....  
--E-- Cannot unpack package gtest  
done installing FairSoft  
  
=====  
= =====
```

Thanking you with appreciation.

Please someone give the hints to sort out the problem.

Thanking you.

Hi,

please try to use fairsoft::nov15p6 and fairroot::v-15.11e. fairsoft::nov15p6 is a patch which solves your problem with gtest.

Ciao

Florian

There was a typo in my last answer. Sorry for that. The correct versions are

fairsoft::nov15p7

and

fairroot::v-15.11e.
