Dear members,

I am trying to install the newest dev brachn R3BRoot, and I get the following error:

```
-- The C compiler identification is GNU 5.2.1
-- The CXX compiler identification is GNU 5.2.1
-- Check for working C compiler: /usr/bin/cc
-- Check for working C compiler: /usr/bin/cc -- works
-- Detecting C compiler ABI info
-- Detecting C compiler ABI info - done
-- Detecting C compile features
-- Detecting C compile features - done
-- Check for working CXX compiler: /usr/bin/c++
-- Check for working CXX compiler: /usr/bin/c++ -- works
-- Detecting CXX compiler ABI info
-- Detecting CXX compiler ABI info - done
-- Detecting CXX compile features
-- Detecting CXX compile features - done
CMake Error at CMakeLists.txt:28 (Message):
```

macros repository is missing in the R3BRoot source directory

```
cd ../R3BRoot
```

```
git clone https://github.com/R3BRootGroup/macros.git
```

```
-- Configuring incomplete, errors occurred!
```

See also " /home/christiaan/Desktop/NewFAIR/R3BRoot_Build/CMakeFiles/CMakeOutput.log".

I have tried updating cmake, FairSoft and FairRoot to the latest version (master branch for FairSoft and dev branch for FairRoot), but the error remained. Can anyone help me?

Thanks in advance!
Christiaan Douma.

all macros are now in the separate repository, there was an announcement sent to the relevant mailing lists.

The fix for your error is given in the error message itself:

cd ../R3BRoot

git clone https://github.com/R3BRootGroup/macros.git

Thank you.

Christiaan.
