Subject: Problem with run_sim.C after new installation

Dear all,

I have just done a new installation of FairSoft, FairRoot and R3BRoot after a system crash. Installation and compilation all went OK without errors (I used dev branches everywhere).

However, when I try to run a simulation with run_sim.C, I get problems.
The full output log is attached. Can anyone help me?

Christiaan Douma.

A Pull Request with the fix for this issue was sent to FairRoot. Will let you know when it is merged.

Best regards,
Dima

It should be fixed now.

Update and recompile your FairRoot and try again.

Best regards,
Dima

The problem is solved. Thanks!

Christiaan.
