Subject: Problems with installation of new FairSoft
Posted by Anna Skachkova on Fri, 30 Apr 2021 10:34:32 GMT

Dear colleagues,

could you, please, provide a new FAIRsoft/PandaRoot installation guide, which is already not
working for the new version of FairSoft? And apr21 version of PandaRoot doesn't work with old
Fairsoft as it asks for e new Cmake version. The description which is present in the FairSoft
page is not clear enougth. Automatical precedure /configure.ch doesn't exist any more. I've got
problems with Cmake and SYSTEM DEPENDENCIES installation. So, please, write step by
step (as it was done before, but in some other words than in FairSoft resource) the whole
procedure of installation.

Thank you in advance,
best regards,
Anna

Dear Anna,
could you provide us with some more details what is not working with the installation of
FairSoft/FairRoot?

Cheers,

Tobias
